## *“Controls”*

### **Standard Controls Packages:**

Metzgar can provide you with one of our standard controls packages for your application. We offer reversing, non-reversing and variable speed packages for the power which is in your facility.

### **Custom Controls Packages:**

Metzgar can provide you with a custom controls package from a simple relay panel to a large control system. We are able to design and build a complete control system to your specification.

Metzgar designs and builds the control panels at our in-house panel build facility. All panels built by Metzgar are tested prior to shipment.
